## Centre for Science, Development and Media Studies (CSDMS)

Centre for Science, Development and Media Studies\*, is a Non Governmental Organisation (NGO), located at Noida, near India's capital city of New Delhi. Founded in April 1997, we are committed to advocacy and developing knowledge solutions for under-privileged societies through the use of innovative and effective Information and Communication Technologies (ICTs). Our activities are targeted to meet the needs of society in the development sector through research in the field of ICT, undertaking development projects through the usage of knowledge-sharing tools and products like print and electronic media, and building capacity through training programmes. Our multi-cultural team has expertise from across disciplines.

## UNDP

UNDP is the United Nation's global development network, an organization advocating for change and connecting countries to knowledge, experience and resources to help people build a better life. They are presently working in 166 countries, working with them on their own solutions to global and national development challenges. UNDP does not represent any one approach to development; rather, their commitment is to assist partner governments in finding their own approaches, according to their own unique national circumstances. UNDP advocates for the Millennium Development Goals (MDGs), the concept of human development and the need to empower women. Its series of global, regional and country-focused Human Development Reports are a powerful advocacy tool with a focus on people-centered, inclusive, equitable and sustainable growth.

## Co-organiser

Department of Agriculture  
and Cooperation, Ministry of  
Agriculture, Government of India

Department of Agriculture and Cooperation (DAC), Ministry of Agriculture, Government of India, formulates and implements National Policies and Programmes for achieving rapid growth and development through optimum utilization of country's land, water, soil and plant resources. DAC, undertakes developmental planning, Agricultural Census, assists States in undertaking scarcity relief measures and in management of natural calamities. It acts to bring about integrated development of marketing of agricultural produce and to safeguard the economic interests of the farming community in general. The department formulate policies for improving agricultural extension services by adopting new institutional arrangements through the involvement of NGOs, Farmers' organisations, and Agricultural Universities, aiming at integrated extension services. DAC supplements the efforts of State Governments for increasing the production and productivity of agricultural and horticultural crops through promotional programmes and promotes measures for production of quality seeds and distribution of improved plant varieties developed by the scientists for increasing productivity.

## IBM

IBM has been present in India since 1992. Since inception, IBM in India has expanded its operations considerably with regional headquarters in Bangalore and offices in 14 cities including regional offices in New Delhi, Mumbai, Kolkata and Chennai. Today, the company has established itself as one of the leaders in the Indian Information Technology (IT) Industry. IBM has set the agenda for the industry with 'on demand business' - a kind of transformation where an organisation changes the way it operates and reduces costs; serving customers better, reducing risks and improving speed and agility in the marketplace. IBM is already working with customers to transform them into 'on demand' businesses. IBM is the only company in the world that offers end-to-end solutions to the customers from hardware to software, services and consulting. Linux support further enhances IBM's e-business infrastructure enabler capability. IBM is the only IT company in the world and also in India that offers end-to-end solutions to customers from hardware to software, services and consulting.

### Designmate (I) Pvt. Ltd.

Designmate is a 19- year-old 3D animation house. It has developed an educational product called "Eureka" covering science and maths subjects. In two years Eureka has the largest client base as an ICT teaching aid in India. It covers class 1 to 12; has over 5000 topics in 135 gigs of data in high quality 3D animation; over 275 hours of playing time with a voice over; assists the teacher to explain concepts; metadata technique enables the user to access any topic within 3 clicks. The 3D animation helps teachers evolve and explain difficult concepts without having to turn the back to the class. The one single factor that separates Eureka from others is the bi-lingual feature built in to the software. Innovation for the remote tribal areas is a survival necessity; but very few of them can make it to our Engineering colleges. By using Eureka the rural children will simultaneously learn spoken English on the 'linguaphone' principle as well as science and maths in English, which would make them eligible for institutes of higher studies and give them better job prospects.

### telecentre.org

telecentre.org is both a social investment program that supports grassroots telecentre networks, and a loose family of organizations with a common commitment to helping the telecentre movement to thrive. The telecentre.org social investment program is a collaborative initiative of the International Development Research Centre, Microsoft and the Swiss Agency for Development and Cooperation (SDC). The program supports organizations and activities that strengthen the telecentre movement. Telecentre.org aims to reinforce a global movement by finding ways that people, communities and networks can connect over common issues to make telecentres stronger and better, together. telecentre.org's investments are focused in four areas namely- building networks, creating content and services, sharing knowledge and connecting people. The strategy is to make investments to benefit the whole telecentre ecosystem: local centres; networks that provide support; social enterprises that develop services and social investors who fund telecentres.

### Bellanet

Since 2003 Bellanet has been directing resources to strengthening its presence in Latin America, Asia and Africa. In 2004-2005 Bellanet's presence in Asia and Latin America was increased and the Africa office in Kampala started operations, while discussions continued regarding a second proposed African node for Bellanet with another organisation in Africa. The expansion of Bellanet presence in the South comes with challenges. A large part of the challenge associated with this strategy is integrating the Bellanet offices in the regions with their host organisations. Agreements are drawn up in each case outlining the mission and vision, target groups, strategic and operational plans and relationships with the different stakeholders in each of these organisations. The Bellanet International Secretariat is a multi-donor initiative created with the mission to promote and facilitate effective collaboration within the international development community, especially through the use of information and communication technologies (ICTs) from its four offices in Ottawa, San José (Costa Rica).

## Commonwealth Connects

The Commonwealth Connects Programme is helping to bridge the deepening digital divide across the 53 countries of the Commonwealth. In an attempt to mitigate this increasing digital fragmentation, a collaborative effort of the Commonwealth Secretariat, Commonwealth partner agencies and member countries has formed the Commonwealth Connects Programme. It is a multi-stakeholder partnership aimed at tapping available Commonwealth resources to fast track positive change. It is a unique initiative that enables the transfer of technology and expertise across the whole Commonwealth. In 2005, the 53 Heads of Government met under the theme "Networking the Commonwealth for Development". At a previous CHOGM, Heads of Government had endorsed what was previously the 'Commonwealth Action Programme for the Digital Divide', now known as the 'Commonwealth Connects Programme', that identified broad programme areas where the Commonwealth had a comparative advantage, in the context of international collaboration, due to a shared legacy of institutional and regulatory development.

## Commonwealth of Learning

The Commonwealth of Learning (COL) is an intergovernmental organization created by Commonwealth Heads of Government to encourage the development and sharing of open learning/distance education knowledge, resources and technologies. COL is helping developing nations improve access to quality education and training. The Commonwealth is a voluntary association of more than 50 independent sovereign states, which provide support to each other, and work together toward international goals. The Commonwealth is described as a “family” of nations, originally linked together in the British Empire, and now building on their common heritage in language, culture and education, which enables them to work together in an atmosphere of greater trust and understanding than generally prevails among nations. Bringing together some 1.7 billion people of diverse faiths, races, languages, traditions and levels of economic development, the Commonwealth represents almost one-third of the world’s population.

## ISfTeH

The International Society for Telemedicine and eHealth (ISfTeH) exists to facilitate the International dissemination of knowledge and experience in Telemedicine and eHealth and to provide access to recognised experts in the field worldwide. The seed of the International Society for Telemedicine was planted at the First International Conference on the Medical Aspects of Telemedicine, held in Tromsø, Norway in 1993. A second attempt was made at the Second conference, held at the Mayo Clinic in 1995 in conjunction with the 2nd Mayo Telemedicine Symposium. The Third International Conference on the Medical Aspects of Telemedicine was held in Kobe, Japan in May 1997. ISfTeH’s goal is to promote & support telemedicine/ e health activities worldwide. It is primarily an umbrella for national Telemedicine and eHealth organisations. The ISfT was re-started on September 14th, 2003 in Tromsø (Norway) on the occasion of the 8th International Conference on Telemedicine.

## Software Park Thailand

Software Park Thailand (SPT) promotes and supports those in the software industry in procurement of human resources, marketing, securing investment and access to and understanding of the latest technology. SPT aims to help each and every stakeholder in Thailand's software industry to use softwares to increase their efficiency and their potential. Software Park Thailand is an organisation under the National Science and Technology Development Agency (NSTDA). Its mission is to be the region's premier agency supporting entrepreneurs and help create a strong world-class software industry that will enhance the strength and competitiveness of the Thai economy. Today, more than 300 active players together employ over 40,000 qualified software engineers in a close-knit network that ranges from the island paradise of Phuket in the South to the picturesque silicon mountain that is Chiang Mai in the North. Thailand's concerted move towards e-Government, the acceptance of e-Commerce and society's gradual transformation into an e-Society will yield a geometric increase in the number of software companies and developers, catering for government and industry alike.

## UNESCO

UNESCO New Delhi Office, the Organization's first decentralized Office in Asia was established in 1948. At its inception, it dealt with science and technology programmes in eleven South and Central Asian countries, i.e. Afghanistan, Bangladesh, Bhutan, India, Iran, Maldives, Mongolia, Myanmar, Nepal, Pakistan and Sri Lanka. In time, it incorporated communication programmes, and still later expanded to include education and culture. As part of UNESCO's new decentralization policy, UNESCO New Delhi is presently designated as a Cluster Office and is a platform for delivery of activities in all areas of UNESCO's competence, namely, education, the natural and social sciences, culture, communication and information. It implements a biennial Cluster programme that is integrated within itself and with the overall goals of the Organization. This is done through a fundamental operating principle - consultation and consensus with the National Commissions of the Member States, Regional Bureaus, civil society representatives, and other stakeholders and partners.

## eHealth

Centre for Science, Development and Media Studies (CSDMS) takes pride in eHealth-Asia's first magazine on ICT applications in healthcare, launched in December 2006. Like the digital divide, a big chasm exists between the quality of the medicare available to the affluent sections and weaker sections. Modern ICT applications in healthcare like EHR, telemedicine, teleconsultation, e-prescriptions are revolutionizing this sector and bridging that divide. It is estimated that in another 10 years the healthcare sector will go paperless and get completely digitalized; in the US the deadline for that transition is year 2014. We are on a mission with a futuristic note; to disseminate information on technology changes in healthcare and communicating that to all stake-holders -physicians, patients and industry. The magazine also provides the best forum for the thought leaders in healthcare to express themselves, sharing their experience in this arena to enable its replication in other countries and situations.

## OneWorld South Asia

OneWorld South Asia is bringing together a network of people and groups working for human rights and sustainable development from across the globe. OneWorld is the world's favorite and fastest-growing civil society network online, supporting people's media to help build a more just global society. The network is governed by the OneWorld International Foundation, whose international Board of Trustees includes a representative nominated by each centre. OneWorld South Asia, based in New Delhi, India, is a part of the OneWorld Network, an international non-profit network that aims to use ICT tools-ranging from the Internet, mobile telephones to community radio-for poverty alleviation and promoting sustainable development. Translating OneWorld's overall mission of harnessing the democratic potential of the Internet to promote human rights into its current strategy, OWSA spells out its mission as "Voicing the Voiceless".

## ALMOE

From a small start-up operation to a definitive one-stop audio-visual solution provider, AlmoE has come a long way in just a decade. Incorporated in 1994, the dynamic company marked its 10th anniversary in 2004 with the introduction of yet another division, further adding to its range of exemplary services. This is in keeping with the company's commitment to monitoring and responding to the needs of the market. Today, ALMOE Group has more than 100 employees and an annual turnover of Dirhams 75 million. Our growth has been marked with awards and recognition, the most recent being the award for: "The Outstanding Sales and Marketing for the year 2002-2003" by Brother International Outstanding Achievement for the year 2002-2003" by EPSON Middle East. ALMOE's Digital Solution division has been awarded the sole distributorship for the entire Middle East for the large range of EPSON printers, color laser printers and RIP software, while the AV System division recently won a 15 million dirham tender for the complete Integration of audio, visual and lighting systems for the prestigious Madinat Jumeriah Resort in Dubai.

## Designmate (I) Pvt Ltd

Designmate is a 19- year-old 3D animation house. We have developed an educational product called "Eureka" covering science and maths subjects. In two years Eureka has the largest client base as an ICT teaching aid in India. It covers class 1 to 12; has over 5000 topics in 135 gigs of data in high quality 3D animation; over 275 hours of playing time with a voice over; assists the teacher to explain concepts; metadata technique enables the user to access any topic within 3 clicks. The 3D animation helps teachers evolve and explain difficult concepts without having to turn the back to the class. It enhances the learning outcome by better engagement, experience and exploration. The topics can be mapped to follow any curriculum. The one single factor that separates Eureka from others is the bi-lingual feature built in to the software. Innovation for the remote tribal areas is a survival necessity; but very few of them can make it to our Engineering colleges. By using Eureka the rural children will simultaneously learn spoken English on the 'linguaphone' principle as well as science and maths in English, which would make them eligible for institutes of higher studies and give them better job prospects.

## IBM

IBM has been present in India since 1992. Since inception, IBM in India has expanded its operations considerably with regional headquarters in Bangalore and offices in 14 cities including regional offices in New Delhi, Mumbai, Kolkata and Chennai. Today, the company has established itself as one of the leaders in the Indian Information Technology (IT) Industry. IBM has set the agenda for the industry with 'on demand business' - a kind of transformation where an organisation changes the way it operates and reduces costs; serving customers better, reducing risks and improving speed and agility in the marketplace. IBM is already working with customers to transform them into 'on demand' businesses. IBM is the only company in the world that offers end-to-end solutions to the customers from hardware to software, services and consulting. Linux support further enhances IBM's e-business infrastructure enabler capability. IBM is the only IT company in the world and also in India that offers end-to-end solutions to customers from hardware to software, services and consulting.

## Media Lab Asia

Media Lab Asia (MLAsia) has been set up by Department of Information Technology, MCIT, Government of India as not-for-profit Research & Development organisation under section 25 of Companies Act. After completion of the initial phase, Government of India has approved a full scope programme for MLAsia. MLAsia works on the paradigm of collaborative research in the task of developing relevant and sustainable technologies and culturally appropriate solutions and bringing them to the daily lives of people. MLAsia works with Academic and R&D institutions, industry, NGOs and Government in this endeavour. The support for this unique endeavour from Government of India is amply demonstrated by way of constitution of a Board of Directors chaired by the Hon'ble Union Minister of Communications and Information Technology & Advisory Board chaired by Dr. R. Chidambaram, Principal Scientific Adviser to Government of India. Other members of the Board and the committee are eminent personalities in the country in their respective areas of specialisation.

## NComputing

NComputing breaks the affordability and complexity barrier that has limited the PC from being deployed everywhere. Most users only tap one to five percent of a PC's processing power and today's multi-core PCs are more powerful than ever. NComputing leverages this trend with small access terminals and proven software that enable a single PC to support up to 30 users at once. The access terminals are low-cost, use very little electricity, and are very easy to setup and maintain. Furthermore, the solution is compatible with standard PC applications so IT staff and end users do not require special training.

## S. Chand & Company Ltd

S. Chand Group is a leading publisher of India with 7 decades of excellence, 7000 titles to its credit and has been pioneers in academic textbooks in engineering, sciences, higher education and for schools. "Empowering Minds" is core to our mission. Education in the past has never been global. In fact education had historically been the matter of national, regional or local concern. Today this is changing. While education has been slow to follow, this path seems certain and is on the immediate horizon. Economical, technological and social drivers are reinventing education and integrating individuals, industries, communities and nations together in an unprecedented way across the globe. 'The Knowledge Corporation' is S. Chand's vision for the future. Capitalizing on its real asset of content and its roots, the group has moved forward in the domains of publishing both print and digital media, formal education and services and developing world products and competencies in technology based learning. S. CHAND Technologies Limited (SCTL) an ISO 9001:2000 certified company; pioneered curriculum based multimedia educational CDs under a unique model of 'Learn for Success'.

## UPSIDE Learning

Upside Learning is a well-established organization focused on delivering quality and effective eLearning solutions to clients worldwide. For us, an effective solution is one that helps you to achieve your learning objectives and in turn enhances your organization's performance. It is a solution designed for your specific needs, whether you seek to increase awareness and competency as a business strategy or to enhance job and application specific knowledge and skills. An effective solution could be a simple, well-designed poster for creating awareness or a complex business simulation through which learning can be applied in real-world-like or fictitious situations. It could be a simple monitoring and tracking tool or an enterprise-wide, competency-based performance management system.

## The United Nations

The United Nations was established on 24 October 1945 by 51 countries committed to preserving peace through international cooperation and collective security. Today, nearly every nation in the world belongs to the UN: membership totals 192 countries. When States become Members of the United Nations, they agree to accept the obligations of the UN Charter, an international treaty that sets out basic principles of international relations. According to the Charter, the UN has four purposes: to maintain international peace and security; to develop friendly relations among nations; to cooperate in solving international problems and in promoting respect for human rights; and to be a centre for harmonizing the actions of nations. The United Nations has six main organs. Five of them-the General Assembly, the Security Council, the Economic and Social Council, the Trusteeship Council and the Secretariat-are based at UN Headquarters in New York. The sixth, the International Court of Justice, is located at The Hague in the Netherlands.
